**Overview of 1H19 Financial Results and Business Outlook**

“Under favorable business environment, we effectively executed business strategies and continuously focused on capturing Japanese enterprises’ IT needs and we believe such efforts were translated to strong 1H19 financial results: total revenue and operating profit exceeded our target. Enterprise recurring revenue<sup>6</sup> strongly grew by 10.2% year over year by accumulating orders of various network services, such as security and mobile, as well as systems operation and maintenance. As for systems integration (SI), demands continued to be strong and gross margin continued to expand, up 13.3% from 1H18. Strong revenue and gross margin growth of both network services and SI absorbed total cost increase and led to operating profit growth. As a result of this good business cycle, we revised our full-year financial targets upwards based on our assumption that favorable IT demands to continue,” said Koichi Suzuki, Founder, Chairman and CEO of IIJ.

<sup>1</sup> Unless otherwise stated, all financial figures discussed in this announcement are prepared in accordance with International Financial Reporting Standards (IFRS), unaudited and consolidated.

<sup>2</sup> YoY is an abbreviation for year over year change.

<sup>3</sup> Net Profit is “Profit for the period attributable to owners of the parent.”

<sup>4</sup> Normalized profit is calculated by allocating JPY2.05 billion of additional cost recorded in 4Q18, as a result of the difference between our estimate (14% decrease) and the actual revision (5% decrease) of NTT Docomo’s mobile interconnectivity unit charge to the attributable each quarter of FY2018. Please refer page 5 of our presentation material for 1H19 earnings which explains this year over year operating profit in details.

<sup>5</sup> For details on our upward revision for FY2019 financial target, please refer to our press release titled “Notice Regarding Differences between Financial Targets and Actual Results for the First Half of the Fiscal Year Ending March 2020 and Revision of the Full-Year Financial Targets” which was announced on November 8, 2019.

<sup>6</sup> The enterprise recurring revenue described here is the sum of Internet connectivity for enterprises (excluding MVNE), outsourcing, and systems operation and maintenance. It does not include WAN revenues, which decreased year over year due to existing large clients’ migration transaction from WAN to mobile.

“Following FY2018, we continued to enhance our comprehensive network service line-ups ranging from Internet, mobile, security, and cloud throughout 1H19. For mobile, we introduced new services such as eSIM by leveraging our full-MVNO infrastructure. To strengthen our IoT business foundation, we have made business alliances with several device manufactures including Advantech, one of the top global industrial computer manufactures. We continuously prepare ourselves for advanced IoT usages and stronger demands which should rise in the middle term from Japanese enterprises. As for DeCurret and JOCDN, our newly established affiliated companies, they both raised capital by inviting new enterprise shareholders and have been executing their business strategy on schedule,” said Eijiro Katsu, President and COO of IJ.

### Regarding the retroactively adjusted 1H19 financial results

As an MVNO, we purchase mobile infrastructure mainly from NTT Docomo Inc. The unit price for mobile interconnectivity charge is revised every year and has been decreasing. Because the unit price is fixed at the end of our fiscal year, we apply our own estimate of unit price decrease rate to calculate mobile infrastructure cost throughout a fiscal year. Difference amount between our estimate and revised charge is recorded as a one-time cost or reduction in cost in 4Q.

In FY2018, the difference between our estimate and the revised was large and we recorded JPY2.05 billion of cost in 4Q18. Essentially this one-time additional cost should have been allocated to attributable each quarter of FY2018. Adjusted figures by the result of such allocation (“Adjusted”) are as follows:

	1Q18	2Q18	3Q18	4Q18
	JPY billion	JPY billion	JPY billion	JPY billion
<b>Accounting period</b>	—	—	—	2.05
<b>Cost allocated to attributable service period</b>	0.48	0.50	0.52	0.55

Adjusted 1H18 results and Adjusted YoY changes are as follows:

## 1H19 Revenues and Income

### Revenues

Total revenues were JPY99,220 million, up 8.8% YoY (JPY91,224 million for 1H18).

Network services revenue was JPY61,204 million, up 5.2% YoY (JPY58,158 million for 1H18).

Revenues for Internet connectivity services for enterprise were JPY18,075 million, up 13.3% YoY from JPY15,955 million for 1H18, mainly due to an increase in mobile-related services revenues such as MVNE and M2M/IoT type revenues by leveraging our full-MVNO infrastructure.

Revenues for Internet connectivity services for consumers were JPY12,997 million, up 3.3% YoY from JPY12,585 million for 1H18. The revenue growth was mainly due to “IIJmio Mobile Service,” consumer mobile services.

Revenues for WAN services were JPY14,342 million, down 7.3% YoY from JPY15,473 million for 1H18, mainly

because of the planned migration projects of large enterprises clients who are moving away from dedicated line to mobile to connect their multiple locations.

Revenues for Outsourcing services were JPY15,790 million, up 11.6% YoY from JPY14,145 million for 1H18, mainly due to an increase in security-related services revenues.

(Notes)

- Numbers in the table above show number of contracts except for "IIJ Mobile Services (enterprise)" and "IIJmio Mobile Service" which show number of subscriptions.
- The numbers of IP service contracts includes the numbers of IIJ data center connectivity service contracts.
- Total contracted bandwidth is calculated by multiplying number of contracts under "Internet connectivity services (enterprise)" except for "IIJ Mobile Services" and the contracted bandwidths of the services respectively.
- Along with our change in accounting principle from the U.S. GAAP to IFRS from the filing of our FY2018 annual report "Yuka-shoken-houkokusho," the reporting period of foreign consolidated subsidiaries are different. As a result, the number of our Internet connectivity service contracts and total contracted bandwidth described above are different from the past disclosure.

SI revenues, including equipment sales were JPY35,916 million, up 15.9% YoY (JPY30,995 million for 1H18).

Systems construction and equipment sales revenue, a one-time revenue, was JPY13,754 million, up 27.5% YoY (JPY10,790 million for 1H18). In addition to an increase in usual revenue of completed project, we recognized JPY1.3 billion of revenue along with construction progresses. Systems operation and maintenance revenue, a recurring revenue, was JPY22,162 million, up 9.7% YoY (JPY20,205 million for 1H18), mainly due to continued accumulation of systems operation orders as well as an increase in private cloud services' revenues.

Orders received for SI and equipment sales totaled JPY36,351 million, up 4.1% YoY (JPY34,928 million for 1H18); orders received for systems construction and equipment sales were JPY14,610 million, almost the same as JPY14,694 million for 1H18, and orders received for systems operation and maintenance were JPY21,741 million, up 7.4% YoY (JPY20,234 million for 1H18).

Order backlog for SI and equipment sales as of September 30, 2019 amounted to JPY51,550 million, up 2.0% YoY (JPY50,529 million as of September 30, 2018); order backlog for systems construction and equipment sales was JPY8,696 million, down 20.7% YoY (JPY10,969 million as of September 30, 2018) and order backlog for systems operation and maintenance was JPY42,853 million, up 8.3% YoY (JPY39,559 million as of September 30, 2018).

ATM operation business revenues were JPY2,100 million, up 1.4% YoY (JPY2,071 million for 1H18).

### Subsequent Events (Unaudited)

Nothing to be reported.

### Changes in Accounting Policies (Unaudited)

The Company applied the following standard starting from the first quarter of the fiscal year ending March 31, 2020.

IFRS		Outline of a new standard and amendments
IFRS 16	Leases	Amendment concerning accounting treatment for leases

The Company adopted IFRS 16 “Leases” (issued in January 2016) from the first quarter of the fiscal year ending March 31, 2020.

According to the transition approach, the Company has adopted IFRS 16 retrospectively and the cumulative effect of applying this standard was recognized as adjustment of retained earnings at the beginning date of the first quarter of the fiscal year ending March 31, 2020. In applying IFRS 16, the Company chooses the practical expedient in IFRS 16 paragraph C3 and assesses whether contracts contain leases in accordance with IAS 17 “Leases” (hereinafter, “IAS 17”) and IFRIC 4 “Determining whether an Arrangement contains a Lease.”

The Company recognized right-of-use assets and other financial liabilities related to leases previously classified as operating leases under the principles of IAS 17 were recognized at the date of initial application of IFRS 16. These liabilities are measured at present value of the remaining lease payments discounted using the lessee’s incremental borrowing rate at the date of initial application. Right-of-use assets are measured retrospectively as if IFRS 16 had been applied from the inception date. Right-of-use assets are depreciated using the straight-line method.

For leases that were previously classified as finance leases as a lessee under the principles of IAS 17, the carrying amount of right-of-use assets and other financial liabilities as of the date of initial application has been measured based on the carrying amount of right-of-use assets and other financial liabilities, respectively, under IAS 17 as of the day immediately before that date.

The following is the reconciliation of non-cancellable operating lease contracts disclosed applying IAS 17 as of March 31, 2019 and other financial liabilities related to leases recognized in the consolidated statement of financial position at the date of initial application.

	(Thousands of yen)
Non- Cancellable operating lease contracts disclosed as of March 31, 2019	11,305,119
Operating lease contracts discounted using the incremental borrowing rate as of April 1, 2019	11,292,343
Finance lease contracts disclosed as of March 31, 2019	18,033,862
Cancellable operating lease contracts, etc.	27,745,102
Other financial liabilities related to leases as of April 1, 2019	57,071,307

As a result of the adoption of IFRS 16, the Company recorded right-of-use assets of JPY38,988,207 thousand and other financial liabilities of JPY39,037,445 thousand at April 1, 2019. In addition, retained earnings decreased by JPY33,728 thousand primarily due to having adopted the method where the cumulative effect of applying this standard is recognized at the date of initial application.

The following practical expedients are used in the adoption of IFRS 16.

- A single discount rate is applied to portfolios of leases with reasonably similar characteristics.
- Leases for which the lease term ends within 12 months of the date of initial application are accounted for in the same way as short-term leases.
- Initial direct costs are excluded from the measurement of the right-of-use asset at the date of initial application.
- The Company uses hindsight to calculate the lease term for lease contracts including options to extend or terminate the lease.

The balances of other financial liabilities related to leases are as follows:

	<u>As of March 31, 2019</u>	<u>As of September 30, 2019</u>
