## **Dell EMC Selected IIJ GIO Singapore Service as a Cloud Service for Dell EMC RecoverPoint for Virtual Machines in Singapore**

TOKYO—October 18, 2016—IIJ Global Solutions Singapore Pte. Ltd. (IIJ Global Solutions Singapore), a fully-owned subsidiary of Internet Initiative Japan Inc. (IIJ, NASDAQ: IJJI, TSE1: 3774), one of Japan's leading Internet access and comprehensive network solutions providers, today announced that the IIJ GIO Singapore Service has been selected as a recommended cloud service for recovery site with “Dell EMC RecoverPoint for Virtual Machines” which is a disaster recovery solution provided by Dell EMC.

The product makes it possible to efficiently protect and recover virtualized applications and data to any point-in-time in VMware environments. IIJ GIO Singapore Service was selected as a recommended cloud service of Dell EMC RecoverPoint for Virtual Machines in Singapore, not just because IIJ offers a high-quality VMware virtualization platform similar to that in Japan, but also because the service has received certification in “Multi-Tier Cloud Security (MTCS) Singapore Standard.” With highly in-demand cloud services for data protection and a disaster recovery (DR) measure in Singapore, IIJ Global Solutions Singapore and Dell EMC expect to support a broad range of joint customers in Japan and Singapore.

IIJ Global Solutions Singapore will continue to offer cloud services that provide customers with security and peace of mind.

### **About IIJ Global Solutions Singapore**

IIJ Global Solutions Singapore Pte. Ltd. (IIJ Global Solutions Singapore) was formerly Exlayer Singapore Pte. Ltd., established in October 2008, and has been a wholly owned subsidiary of IIJ since joining the IIJ Group in April 2012. The company serves as the IIJ Group's representative in Singapore, supporting IT implementation for both local companies and Japanese companies with locations in Singapore and the surrounding countries.
